Sixth Grade Expectations

Core content and elective course sessions

For most core content courses, our 6th grade learners have the opportunity to attend one LiveLesson session offering each week.

Elective courses may vary from biweekly to monthly, depending on the course.

Intervention sessions

As part of our Response to Intervention process, teachers identify students who may be struggling with specific concepts and develop short (15-20 minute) targeted intervention sessions to support student mastery. Teachers will invite students who need support on a specific standard or objective to join a live instructional session.
